MOHAMED SALEH

SENIOR FRONTEND WEB DEVELOPER

Obour, Egypt | mohamedsaleh@sci.asu.edu.eg | 01090108002 | LinkedIn | Portfolio

Senior Frontend Developer & AI Researcher with 5+ years of experience building scalable web applications. Expert in React.js, JavaScript (ES6+), and Modern CSS, with a strong backend foundation in PHP/WordPress. Unique background as a University Demonstrator and M.Sc. Candidate in AI/ML, specializing in neural networks. Proven track record in optimizing web performance by 20% and leading full-cycle development for complex business solutions.

PROFILE

- **Professional Experience:** Senior Frontend Developer with 5+ years **at Rowaad**, focused on enhancing user experience through innovative, responsive, and scalable web solutions.
- **Academic Background:** Demonstrator at **Ain Shams** University since 2018; graduated with high honors in Mathematics and Computer Science.
- **Research & AI:** Master's candidate specializing in AI/ML, with a thesis focused on **Feature Extraction for Electroencephalogram (EEG) signals classification using Neural Networks.**
- **Core Skills:** Expert in **JavaScript**, **React.js**, **PHP**, and **Python**, with a unique ability to bridge the gap between advanced academic research and scalable, industrial-grade web applications.

PROFESSIONAL EXPERIENCE

Senior Web & Frontend Developer | Rowaad *Mar 2020 – Present*

Phase 1: Full-Cycle Web Project Development (2020 – 2023)

- Managed the end-to-end development lifecycle for diverse web projects, specializing in **WordPress** and **OpenCart** platforms.
- Tailored complex themes and developed custom plugins to meet specific client business requirements.
- Collaborated directly with stakeholders to define project scopes, resulting in a **30% increase in user engagement.**

Phase 2: Advanced Frontend Engineering & Optimization (2023 – Present)

- Diverse to building dynamic, single-page applications (SPAs) using **React.js**.

- Successfully **reduced website loading times by 20%** through efficient code practices and resource management.
- Integrated RESTful APIs to streamline data flow and enhance application performance.
- Partnered with cross-functional teams to translate complex wireframes into high-performance code.

Demonstrator (Teaching Assistant) | Ain Shams University *Jun 2018 – Present*

- **Academic & Research Integration:** Leverage a strong foundation in **Mathematics and Computer Science** to bridge the gap between theoretical research and practical software applications.
- **Advanced Instruction:** Deliver tutorials and laboratory sessions for undergraduate courses, focusing on programming languages (Python, Java, C++) and core CS concepts.
- **AI/ML Academic Support:** Integrate modern AI/ML frameworks (e.g., PyTorch) into practical sessions to foster student learning in neural network architecture.
- **Research Contribution:** Actively involved in the academic community as an **M.Sc. candidate,** focusing on **Feature Extraction for EEG signals classification.**

SELECTED PROJECTS & KEY ACHIEVEMENTS

Delivered 100+ web projects over 5 years, ranging from complex E-commerce platforms to high-performance SPAs and corporate solutions.

SELECTED REACT.JS PROJECTS (Available in Portfolio)

1. **A showcase of high-performance, scalable Single Page Applications (SPAs) developed using React.js and modern frontend ecosystems.**
    - **Multi-Vendor E-commerce Ecosystems | View Live Demo/Case Study: *Scope: Engineered comprehensive Admin and Vendor dashboards for multi-seller platforms.**
        - Features: Real-time order tracking, vendor commissions, and dynamic inventory management.
        - Tech: React Redux, Context API, Axios, Tailwind CSS.
    - **Integrated Learning Management Systems (LMS) | View Live Demo/Case Study:**
        - Scope: Developed end-to-end academic platforms featuring course enrollments and student portals.
        - Features: Real-time student-teacher chat, automated booking systems, and video course progress tracking.
        - Tech: React Redux, Context API, Axios, Tailwind CSS, React Router, Framer Motion.

- **Advanced Real Estate & Booking Platforms | View Live Demo/Case Study:**
    - Scope: Built property management systems with integrated unit booking and online payment gateways.
    - Features: Interactive property maps, unit availability calendars, and Stripe/PayPal integration.
    - Tech: React Hooks, React Redux, Context API, Axios, Tailwind CSS, React Router, Framer Motion.
- **Healthcare & Hospital Management Systems | View Live Demo/Case Study:**
    - Scope: Architected clinical dashboards for hospital departments and patient record management.
    - Features: Automated reporting, data visualization for medical statistics, and secure doctor-patient communication.
    - Tech: Chart.js / Recharts (Statistics), Material UI (MUI), React Hooks, React Redux, Context API, Axios, Tailwind CSS, React Router, Framer Motion.
- **Sports Academy Management | View Live Demo/Case Study:**
    - Scope: Custom solutions for sports facilities to manage memberships, training schedules, and performance analytics.
    - Tech: React Query, Styled Components, AI-assisted UI components.

2. **E-commerce Systems (OpenCart & WordPress/WooCommerce) View Live Demo/Case Study.**

- Scalable Online Stores: Developed and deployed 40+ full-featured e-commerce platforms using OpenCart and WooCommerce, focusing on secure payment gateway integration and optimized checkout flows.
- Customization: Engineered custom OpenCart modules and WordPress plugins to handle complex shipping rules and multi-currency support, resulting in a seamless shopping experience.
- Inventory Management: Integrated advanced inventory and API synchronization tools to manage 10,000+ SKUs across various retail sectors.

3. **Corporate & Informational Platforms (WordPress) | View Live Demo/Case Study.**

- Brand Identity Sites: Built 100+ responsive, SEO-optimized corporate websites for international and local firms, prioritizing brand storytelling and user lead generation.
- Performance-First Design: Leveraged Elementor and Gutenberg along with custom CSS/JS to achieve high Google Page Speed scores (90+) while maintaining complex visual layouts.
- Dynamic Content: Developed custom post types and advanced taxonomies to create manageable, scalable content structures for news portals and business directories.

EDUCATION

B.Sc. in Mathematics and Computer Science | Ain Shams University *Jan 2012 – Jan 2016*

- **Grade:** Graduated with a general grade of **Very Good**, reflecting strong academic performance.
- **Academic Standing:** Graduated with High Honors, ranking among the top students in the department.
- **Core Curriculum:** Focused on Advanced Mathematics, Data Structures, Algorithms, and Software Engineering.
- **Key Achievement:** Developed a deep analytical foundation in mathematical modeling and computational logic.

TECHNICAL PROFICIENCIES

- **Programming Languages:**
  - **Frontend Technologies:** React.js, JavaScript (ES6+), HTML5, CSS3, SASS, Tailwind CSS.
  - **Backend & CMS:** PHP, WordPress (Custom Themes/Plugins), OpenCart, MySQL..
  - **AI & Data Science:** Python (PyTorch, Scikit-learn), Feature Extraction, EEG Signal Analysis.
  - **Familiar / Academic Knowledge:** Java, C++, MATLAB**.**
  - **Tools :**Git, Docker, Vite, Webpack, Postman.
- **AI & Research Skills:**
  - Machine Learning: Neural Networks, Feature Extraction, Signal Processing.
  - Specialized Data: EEG Data Analysis and Classification.
  - Mathematics: Advanced Mathematical Modeling, Linear Algebra, and Statistics.

AI-Assisted Development

- **AI-Assisted Development & Tooling**
  - AI-enhanced development workflows using **ChatGPT, Gemini, and AI coding assistants**
  - Experience with **AI-powered IDEs and agents** such as **Cursor**
  - Familiar with **AI agent frameworks and orchestration concepts**
  - Experience integrating tools through **MCP (Model Context Protocol)** for enhanced development workflows
